### **EMBEDDED ANALYTICS**

Mi9 Merchant integrates a powerful data warehouse and retail analytics suite, enabling flexible exploration and actionable insights. Its seamless master data integration ensures a single source of truth, offering a unified enterprise view with advanced drill-up, drill-down, and cross-hierarchy capabilities.

### **INVENTORY DAYBOOK**

The Inventory Daybook offers detailed reporting to support planning, allocation, and replenishment while tracking stock levels and ensuring accurate margin calculations.

### **INTEGRATED SALES AUDIT**

Automated Sales Audit detects and resolves errors, duplicates, or missing data before exporting to financial systems, eliminating manual reconciliations.

### **STORE PORTAL & MOBILE APP**

Mi9 Merchant offers a secure web portal and mobile app for store users to manage inventory, access price change reports, and perform receiving functions directly in the centralized database.
