

INVENTORY MANAGEMENT TRANSFORMED

Empower your Store Associates with Mi9 Store Inventory Management (SIM). Accessible via cloud or mobile (iOS & Android), perfect for retailers handling large inventories and SKUs, on the floor or in the back office.

UNIFYING INVENTORY MANAGEMENT

Mi9 Store Inventory Management (SIM) offers a secure mobile app and web portal that integrates with your Head Office and POS systems, enabling store associates to manage inventory transactions—like orders, receipts, transfers, and cycle counts—in real-time. Boost retail efficiency, ensure accurate inventory, and enhance customer experience with real-time data at your associates' fingertips.

REAL-TIME MANAGEMENT

Manage inventory and view SKU details on mobile. Track orders, transfers, and enterprise inventory. Access vendor, product, and alternative item info to boost upselling.

SIMPLE INTEGRATION

The Mi9 SIM Portal can integrate with your retail Management System and Point of Sale via APIs.

ORDER MANAGEMENT

Manage orders, track shipments, and fulfill eCommerce purchase orders seamlessly via the Store Portal or Mobile App.

INVENTORY ACCURACY

Conduct product inquiries, manage inventory counts, adjust stock, and replenish sales floor inventory efficiently.
